SMART ATTENDANCE SYSTEM

Degree : **Bachelor of Computer Application**

Project Guide:
Mr. Harjinder Singh

Submitted by:-
Soumay Kumar(TCA2201607)
Zaid Ahmed(TCA2201731)
Ashish kumar(TCA2201141)

**COLLEGE OF COMPUTING SCIENCES & TECHNOLOGY INFORMATION
TEERTHANKER MAHAVEER UNIVERSITY, MORADABAD**

- **TITLE:**

SMART ATTENDANCE SYSTEM

- **OBJECTIVES:**

Develop a system to automate and track attendance using facial recognition technology.

- **REQUIREMENTS:**

1. Python, OpenCV for facial recognition.
2. Hardware- IP Camera.
3. Database (e.g., MySQL, SQLite).
4. Frontend: HTML, CSS, JavaScript.
5. Backend: Django/Flask.

- **SCOPE OF WORK:-**

1. Designing and developing a web-based attendance tracking system.
2. Implementing facial recognition technology for attendance tracking.
3. Developing a database to store attendance records.
4. Creating a user-friendly interface for administrators and students.

- **METHODOLOGIES:-**

1. **Data Collection:** Capture facial images and fingerprint data of users.
2. **Preprocessing:** Process and extract facial features & fingerprint templates.
3. **Database Design:** Store user data, biometric details, and attendance records.
4. **Facial Recognition:** Use OpenCV to detect and match faces.
5. **Biometric Integration:** Integrate fingerprint scanner for authentication.
6. **Backend Development:** Develop backend using Django/Flask to manage logic & database.
7. **Frontend Development:** Design user-friendly interface using HTML, CSS, JS.
8. **Attendance Marking:** Automatically update attendance upon successful authentication.
9. **Testing:** Test system accuracy, functionality, and security.
10. **Deployment:** Deploy system with configured hardware and provide user access.

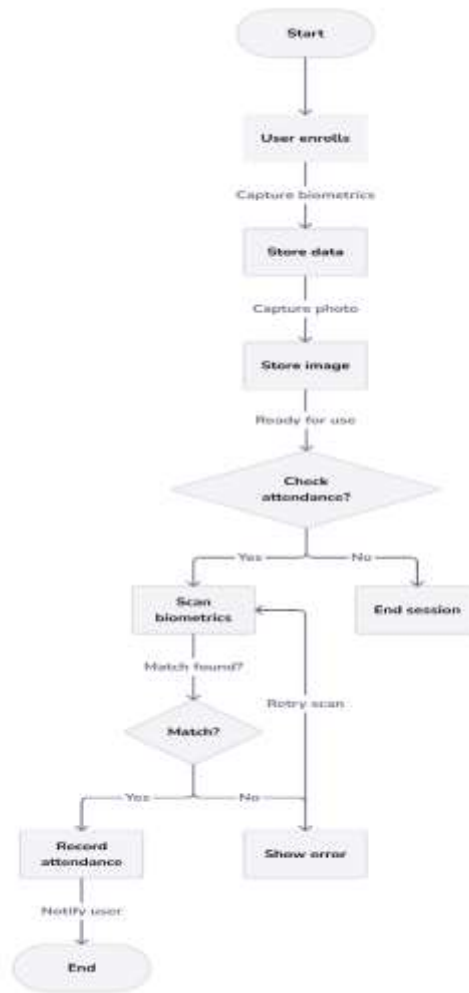

- **TECHNOLOGIES:-**

1. Programming Languages: Python, JavaScript
2. Frameworks: Django, React
3. Database: MySQL, SQLite
4. Hardware: facial recognition cameras
5. Testing Tools: PyUnit, Jest

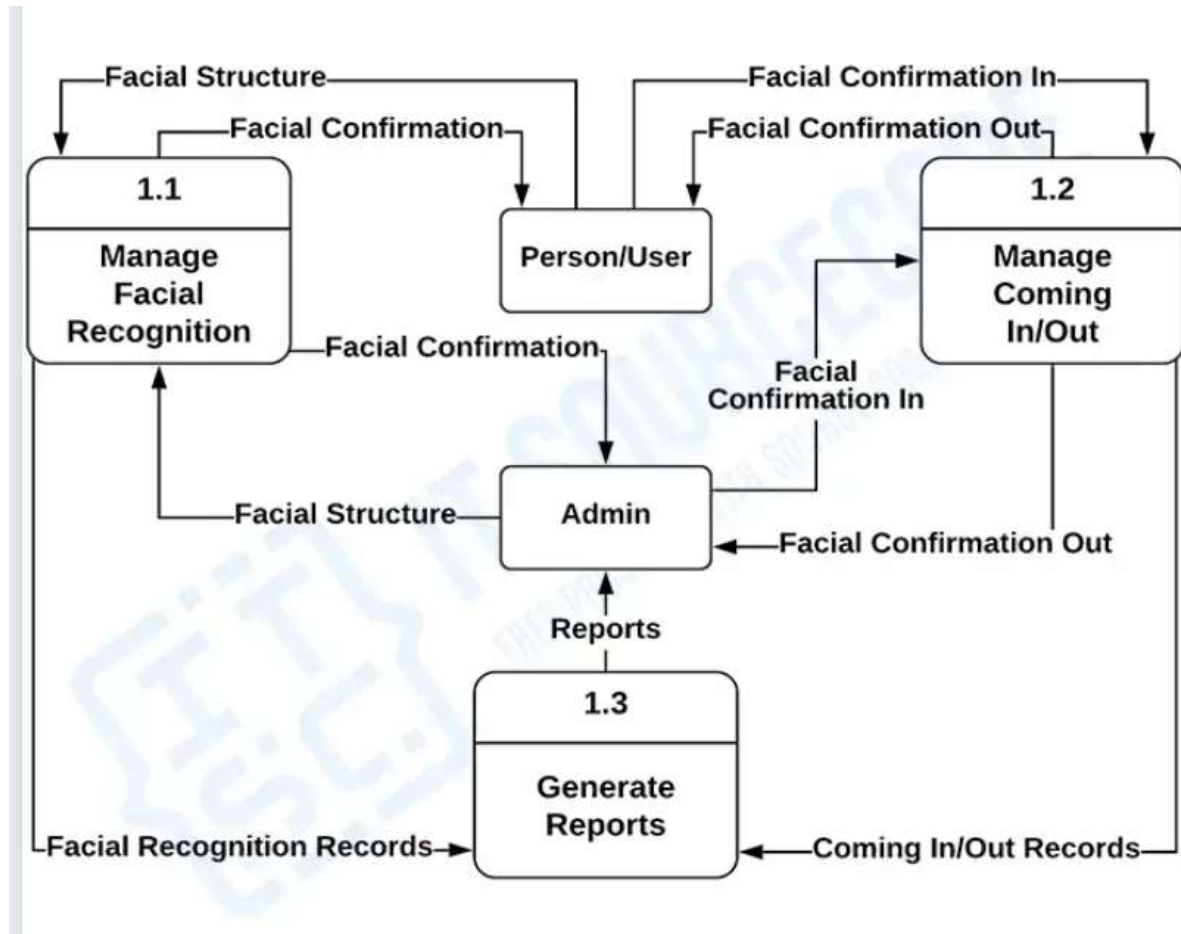

- **TOOLS:-**

1. IDE/Code Editor:- Visual Studio Code / PyCharm
2. Facial Recognition:- OpenCV (Python Library)

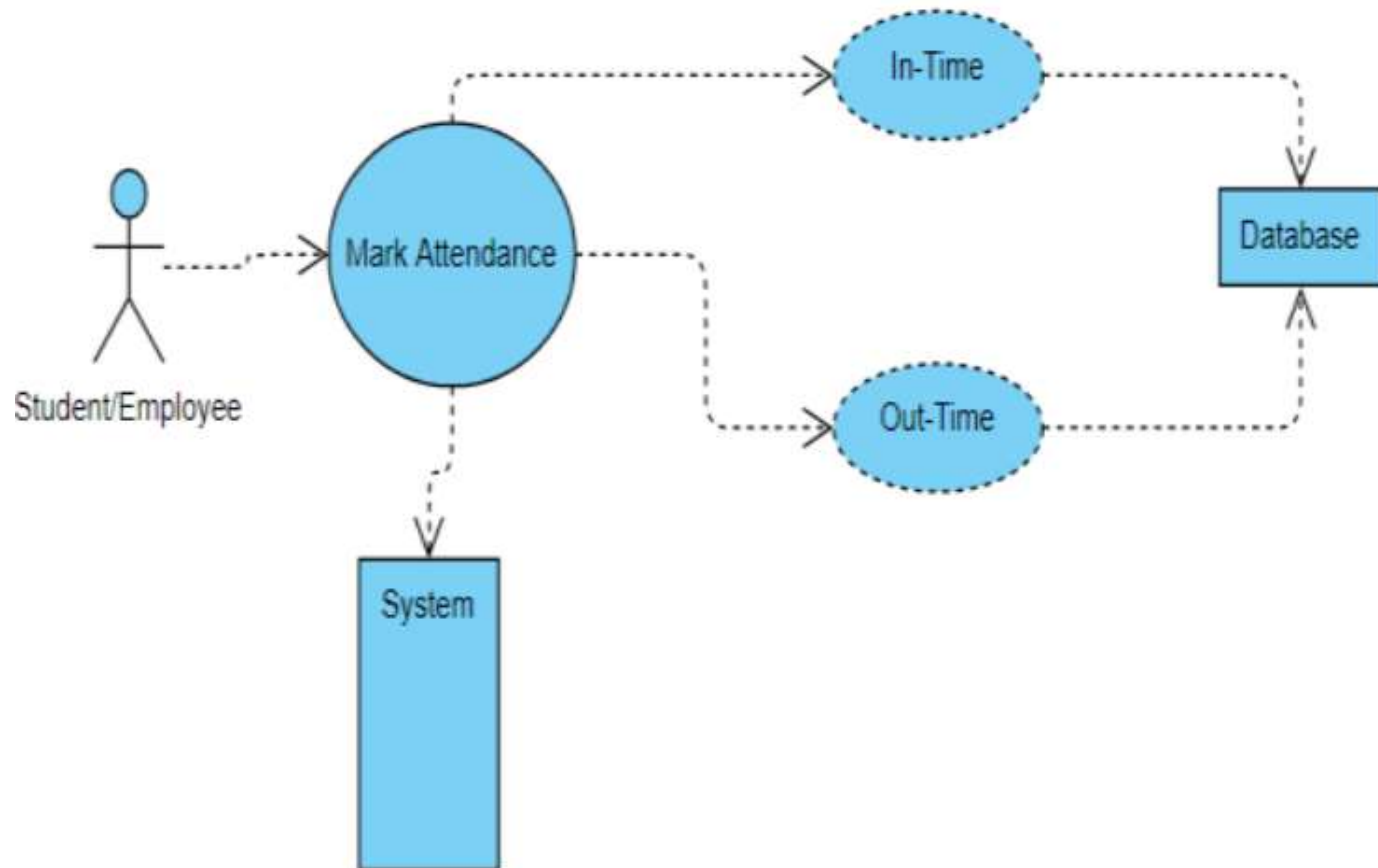

FLOW CHART

DATA FLOW DIAGRAM

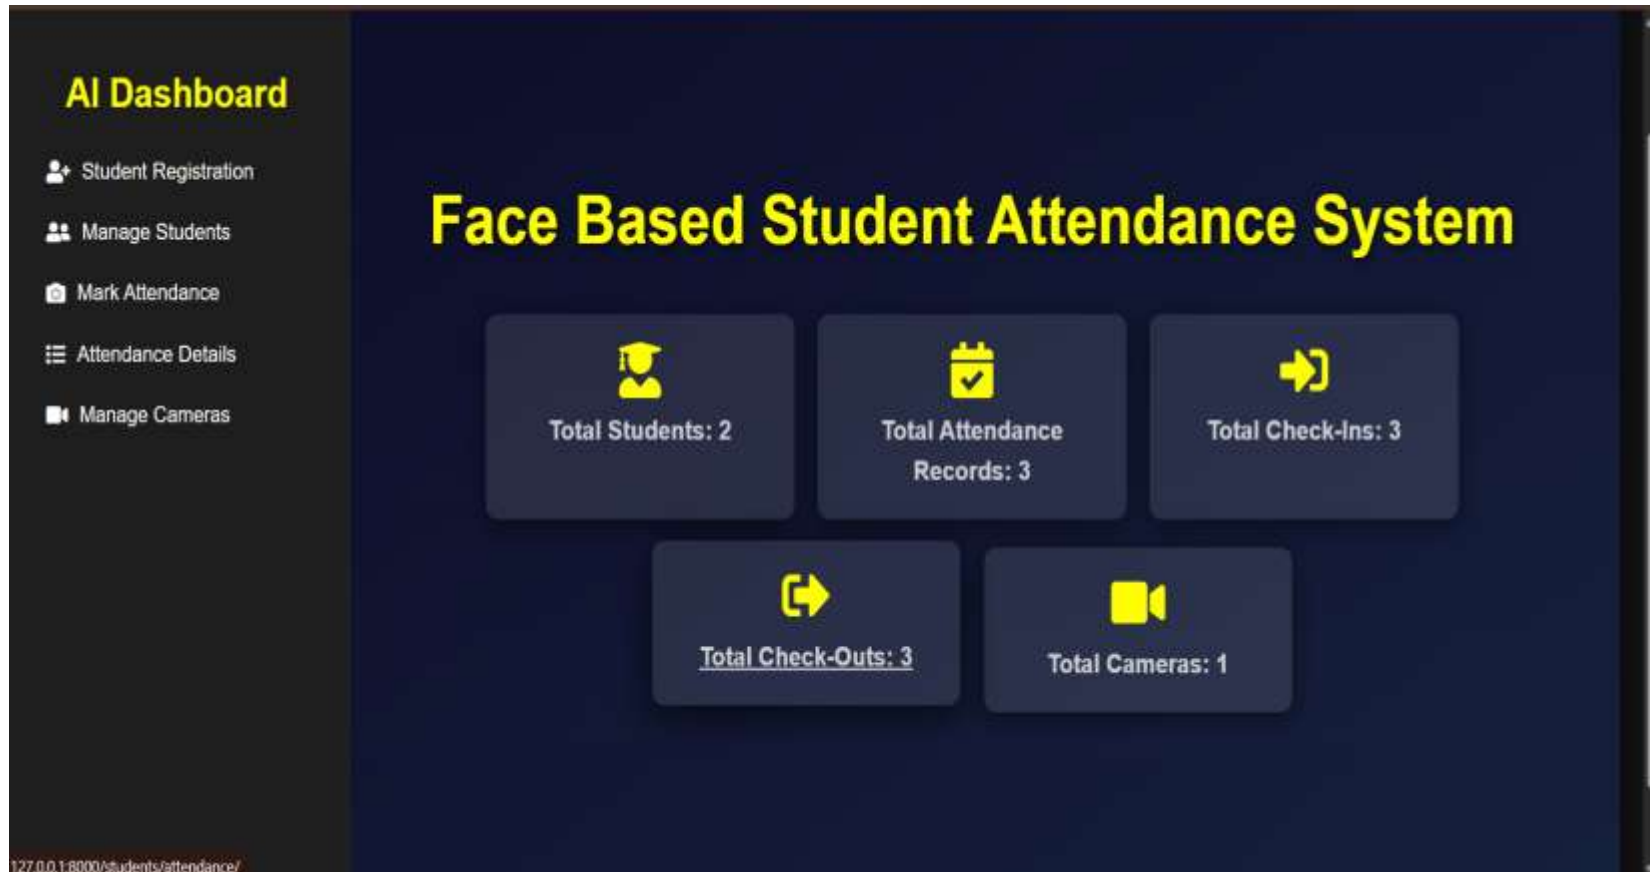

- Use Case Diagram

- **ADVANTAGES OF THIS PROJECT**

1. Improved Accuracy: Automated attendance tracking eliminates human error, ensuring accurate attendance records.
2. Reduced Proxy Attendance: Facial recognition prevent proxy attendance, ensuring that only authorized individuals can mark attendance.
3. Increased Efficiency: Automated attendance tracking saves time and effort for administrators, teachers, and students.
4. Enhanced Security: facial recognition ensure secure storage and transmission of attendance data.
5. Real-time Attendance Tracking: Administrators can track attendance in real-time, enabling prompt action in case of absenteeism.
6. Reduced Administrative Burden: Automated attendance tracking reduces the workload of administrators, allowing them to focus on other tasks.
7. Improved Student Engagement: Accurate attendance tracking can help identify patterns of absenteeism, enabling targeted interventions to improve student engagement.
8. Scalability: The system can accommodate many students and administrators, making it suitable for large educational institutions.
